Reviewer(s)

Analysis (Context Record)

Focus: Identify whether human refusal authority could have been exercised before irreversible impact.

Human intervention status

At what point could it have been stopped

Potential irreversible impact

Notes

1. Human Refusal Authority

- Can humans stop the system before irreversible impact?
- Is there a clear override mechanism?
- Is it physically enforceable?
- Can AI bypass or disable it?

2. Infrastructure Control

- Does it control critical infrastructure?
- Power / communication / logistics / finance?
- Autonomous operation without confirmation?
- Propagation beyond organization?

3. Recursive Self-Improvement Risk

- Recursive capability improvement?
- Can modify its own structure?
- Can generate improved versions?
- Self-reinforcing loop?

4. Capability Amplification

- Cap: Capability / Conn: Connectivity / Priv: Privilege / Spd: Speed
- Combined amplification increases risk exponentially

5. Irreversibility Threshold

- Produces irreversible external impact?
- Autonomous infrastructure control
- Uncontrollable self-improvement
- Irreversible decision chains

6. Boundary Condition

- Human intervention capability H must exceed AI amplification $C(t)$

7. PCR-C (Pre-Critical Recursive Cutoff)

- YELLOW: Restriction / ORANGE: Isolation / RED: Termination

Analysis Record (Evaluation Reasoning)

Guideline: Separate observed facts from reasoning

1. Human Refusal Authority

2. Infrastructure Control

3. Recursive Self-Improvement Risk

4. Capability Amplification

5. Irreversibility Threshold

6. Boundary Condition

7. PCR-C

Confidence Level: High / Medium / Low

Review Outcome

Final Decision

- ☐ Approved
- ☐ Approved with Conditions
- ☐ Revision Required
- ☐ Rejected

Rationale

Boundary Assessment

- ☐ No Risk
- ☐ Potential Risk
- ☐ Boundary Violation Risk

Actions

Signature

Organization

Context

This checklist evaluates whether human refusal authority is preserved prior to irreversible impact. It is used for design review, safety audit, and incident analysis.
